

Rail Guided Hydraulic Presses

Our rail guided presses are offered in sizes from 2-2,500 tons. Each press is built to last a lifetime.

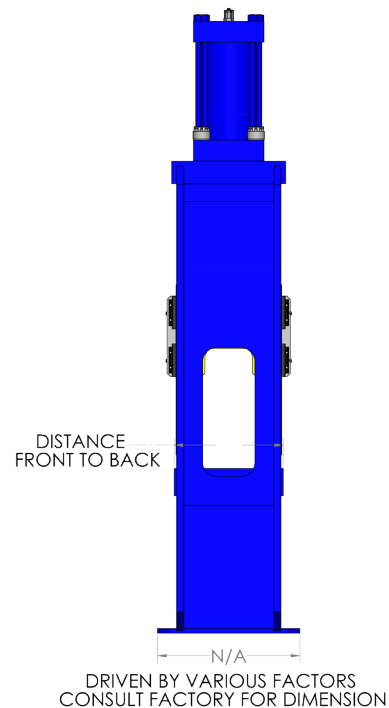

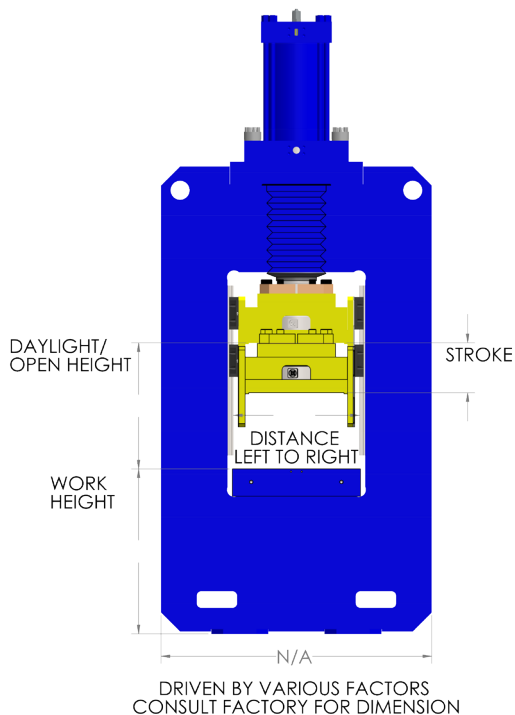

Features

- Lifetime Frame Warranty
- High Speed
- Industry Standard Components
- Safety Compliant
- Open Architecture Controls
- Standard or Custom Frames

Specifications

Neff Press designs and manufactures rail guided presses from 2-2,500 tons with various dimensions. Please use the drawing below to fill out your press specifications.

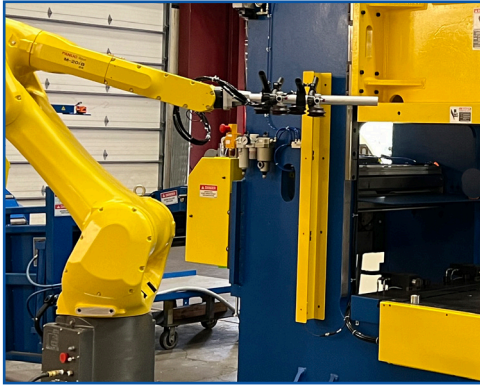

Note: Driven by various factors. Consult factory for dimensions.

Custom Options

Neff Press offers an extensive array of optional equipment in order to customize your press to ensure it meets your application specifications. Common options include:

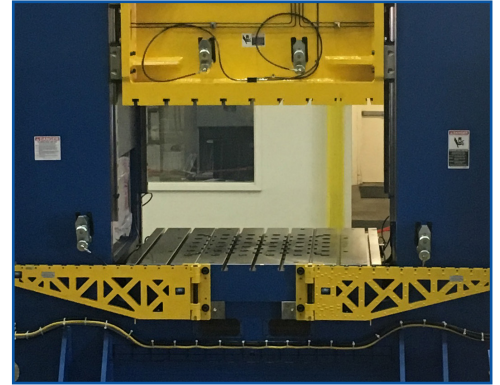

- Knock-out cylinders
- Press guarding systems
- Lube systems
- Water glycol compatible
- Heated Platens
- Cooled platens
- Heat exchangers
- One/Two- hand trip
- Die cushions
- RCS packages (ram control)
- Force/Distance monitoring
- Automatic press cycle
- Safety Die block
- Energy efficient hydraulics
- Speed control
- High speed power units
- Cushion knock-outs
- Preventative maintenance
- Explosion-proof controls
- Pre-fill hydraulic circuits
- Shuttle systems
- Air to oil coolers
- Frame modifications
- Bolster machining
- CNC controls
- Dwell timers
- Feed integration
- CE/CSA/UL compliance
- Foot control
- Index units
